PROFILE

Web Developer with 8+ years of experience specializing in healthcare technology, building real-time applications and complex systems for patient information management, appointment scheduling, and telemedicine. Skilled in both front-end and back-end development, optimizing content management, e-commerce for medical supplies, and patient communication interfaces. Proven ability to lead teams, ensure compliance with industry standards, and deliver high-quality, scalable solutions.

WORK EXPERIENCE

FIRMINIQ Systems Pvt. Ltd. 2019 - PRESENT

Technology Analyst

Roles and Responsibilities:

- Leveraged AI-powered tools such as GitHub Copilot, Cursor AI and Cloud AI for code generation, debugging, and optimization, significantly improving development speed and code quality.
- Developed and maintained scalable, high-performance React applications with reusable, modular components.
- Integrated RESTful APIs for dynamic data fetching and optimized performance using React.memo and lazy loading.
- Implemented state management with Redux, Context API, and optimized re-renders.
- Ensured cross-browser compatibility and responsive design with modern UI libraries.
- Improved SEO and accessibility compliance, ensuring applications meet WCAG standards.
- Worked in an Agile/Scrum environment, collaborating with cross-functional teams to deliver projects on time.
- Used Git, GitHub, for version control, conducting code reviews and improving development workflows
- Provided support for production issues
- Analysed client requirements, created impact analysis, provided implementation solutions, and coordinated with the team to deliver the new change.
- Led and mentored a team of React developers, conducting code reviews, pair programming, and technical training to enhance team expertise.
- Managed and prioritized team tasks, deliverables, and deadlines, ensuring efficient resource utilization and smooth execution.

- English
- Hindi
- Punjabi

EDUCATION

- Master of Computer Applications
- Bachelor of computer Application

PERSONAL DETAILS

DOB - 02-04-1987
Married

Projects

1. VitalSight Practitioner Portal

Description: Developed a health management program aimed at individuals committed to improving their overall health and preventing heart attacks or strokes. This initiative, part of OMRON's Health Management Declaration, focuses on empowering users to take control of their heart health.

Key Features: Implemented the VitalSight remote patient monitoring system, which utilizes connected medical devices to enable patients to monitor their heart health regularly from home.

Technologies Used: Node, AWS Services, React, DynamoDB, Athena, Serverless Architecture etc

Link/Reference: https://vitalsight.omronwellness.com/

2. OMRON's Health Coordinator System

Description: Developed a customer service portal designed for patient coordinators and customer care staff. The system facilitates improved patient tracking and support, enhancing the ability of hospitals to engage with patients effectively.

Key Features: Provides tools for patient coordinators to assist hospitals in monitoring patient progress, scheduling follow-ups, and maintaining direct communication. Aims to improve patient engagement and streamline the care process.

Technologies Used: Node, AWS Services, React, DynamoDB, Athena, Serverless Architecture etc

Infozzle Software Solutions Pvt. Ltd. 2014 - 2019
Web Developer

Experienced WordPress Developer skilled in custom theme/plugin development, Divi customization, and Figma to WordPress conversions. Expertise in speed optimization, SEO, security, and third-party API integrations. Proven ability to build and scale e-commerce, membership, and dynamic content sites. Passionate about delivering high-performance, responsive, and visually engaging websites.

Key Skills:

- **WordPress Development** – Custom themes, plugins, page builders (Divi, Elementor, WPBakery)
- **Front-end Technologies** – HTML, CSS, JavaScript, jQuery, React
- **Back-end Development** – PHP, MySQL, REST API, AJAX
- **E-commerce & CMS** – WooCommerce, Membership Sites, Custom Post Types
- **Optimization & Security** – SEO best practices, website speed, caching, security hardening
- **Third-party Integrations** – Payment gateways, CRM, API connections
- **Hosting & Deployment** – cPanel, Cloudflare, DNS management, WordPress migrations
- **Troubleshooting & Maintenance** – Debugging, updates, backups, issue resolution

Responsibilities:

- Develop and maintain custom WordPress themes and plugins
- Convert Figma/PSD designs into fully responsive WordPress websites
- Optimize website speed, security, and SEO performance
- Integrate and customize WooCommerce and membership platforms
- Troubleshoot and resolve website issues, bugs, and performance bottlenecks
- Implement third-party APIs and payment gateway integrations
- Manage domain configurations, DNS records, and hosting environments
- Ensure cross-browser compatibility and mobile responsiveness
- Collaborate with designers, marketers, and clients for project execution

I affirm that the information compiled in this document is precise & accurate in its entirety and that the certificate of which can be produced anytime, if required
